

Free Car Care Clinic

Take Control Knowledge is Power

Have you ever felt intimidated having your car serviced? With today's economy it is more important now than ever before to service your vehicle and prevent costly damages. Many people avoid taking their car in to be serviced because of fear that they will be taken advantage of.

At Big O Tires we want our customers to feel confident making automotive decisions. We hope to give our customers the gift of empowerment by providing valuable information at our Car Care Clinics.

We explain car care basics such as oil changes, wiper blades, brakes, alignment and how to change a tire. New and used parts and tires are compared to show the differences.

Get a few friends together or bring your son or daughter and learn about your vehicle and how to maintain it.

MAY 
is car care month
